Taking Construction to New Heights

www.alamrygroup.com

We bring innovative standard setting products and services to our market by partnering with global leaders and creating value-adding businesses ourselves. Our success is based on trusting relationships with our suppliers and customers and our belief in our community and its people.

Outlook

The UAE has the fastest growing economy in the world. With double digit GDP growth and highest per capita income, UAE is geared for tremendous growth well into the year 2030. It is considered a key gateway between Europe and Asia. It is a mega business hub and distribution channel to a population of over 3 billion people.

Most of the world's Fortune companies are either already here and expanding operations or planning to make it the regions' corporate headquarters of choice. As a result there is a real estate construction boom that will deliver some of the most planned, prestigious, and sophisticated environments for working, living and leisure.

Profile

The Al Amry Group of Companies owns and manages a diversified business portfolio, involved in construction, trading, automotive supply and services. Since its foundation, the Group has been dedicated to providing the highest quality of products and services through a committed, professional management and staff.

The Group began in 1972 with the founding of Al Amry General Transport Establishment. It started with a small fleet of trucks and equipment, serving the Abu Dhabi Municipality. Today, the Group comprises twenty-four business units. Headquartered in Abu Dhabi, the Group operates subsidiaries and affiliates in Africa and Asia, as well as across the Arabian Peninsula.

The Company continues to grow, and is always looking for new opportunities. Its priority is to add value to its many customers and to the local communities where it operates.

Our Strategy

Al Amry Group has based its business strategy on building alliances with leading global brand owners. Across its four business areas and market sectors, the Group maintains strong ties with industry leaders. This gives the Group a distinct competitive advantage in new technology, best practices and innovation, enabling it to add greater value to its many customers.

Arab Korean General Contracting (Genco)

Arab Korean Gen. Cont. Co. LLC (Genco), is a successful construction company established in 2001 and headquartered in Abu Dhabi - the capital of the United Arab Emirates.

Our collective resources give us tremendous synergies that have not only managed and constructed multimillion dollar projects, but also utilize some of the most proven methods and sophisticated technologies to provide quality and significant cost savings.

Our projects include high-rise buildings, dams, roads & highways, bridges, tunnels, earthwork projects, and other heavy engineering tasks, etc. We have highly experienced and qualified engineering and management teams deployed in the execution of high profile and prominent projects in the region.

Genco's main focus is on helping our customers succeed so that the relationships we participate in are worthwhile for all parties. We provide high quality products and services that are timely and competitively priced.

Genco is strongly committed to the community in which we live, work and play. We believe in sharing our professional, financial, and collaborative resources with our employees, customers, and suppliers, so that we have a stronger and more vibrant community that continues to improve the quality of life.

Genco is one of the leading regional companies in the industry with respect to developing infrastructure, high-building projects, and urban development.

Areas of Construction and Business

Genco's range of services covers all stages of the construction process. We focus on retaining the resources that make this possible.

Our business sectors provide close and collaborative support to Genco's technical sectors that not only adds value to the final outcome, but allows more control and greater profitability by reducing layers.

For instance, our transportation sector which is owned by the Al Amry Group of Companies which specializes in repairing heavy equipment such as caterpillars, cranes, wheel loaders, trucks, trailers, hydraulic shovels and other construction equipment, enables us to meet schedules and deliver controlling costs.

Engineering & Construction

Genco is enjoying significant growth in the UAE market as a result of the overall expansion of the real estate sector and construction industry in the region. Robust growth is taking place in the UAE and other Gulf countries, as seen by numerous key indicators and research studies. The transactions in real estate are reaching trillion dollars with number of building permits continuously increasing due to the continued commitment from the international community in terms of their investment in the region.

Our structural engineering projects include Residential Buildings and Estates, Commercial and Industrial Facilities, Shopping Centers and Business Parks, Office and Commercial Buildings, Hotels, Banks, Multi-storey Car Parks, Cinema Complexes, Sports Facilities, Sheds, Warehouses and Production Facilities, Public Buildings, Hospitals and large housing developments.

- Al Wadha Mall Extension

Our Mission

Our mission is to contribute to the evolution of the fast-growing construction industry in the region and the welfare of customers through the performance of its business.

Genco Road Division

With the rapid and burgeoning growth in the construction sector, Al Amry Group ventured into the road works sector, realizing the vast potential in this market segment, fully confident that its group companies were more than capable of executing major Infrastructure and Road works. Our involvement in this sector has steadily grown and we are today amongst the leading names in the business.

Our services cover traditional road construction & infrastructure including bridges, tunnels and flyovers. Our goal is to be one of the leading companies in the field and to this end, we have been investing in state-of-the-art modern and sophisticated plants, equipment and technology.

The company owns and operates modernised plants, the latest in paving equipment and is supported by the group transport division. Our fleet and equipment are the latest using sophisticated technology, which gives us the cutting edge over our competitors.

Our manpower is our greatest asset and the company invests in their regular training, always ensuring strict safety standards in all projects and operations.

Genco MEP Division

Although we began primarily as an MEP division handling our own contracting requirements, we kept pace with the progress of the UAE, and with the passage of time, our activities have spread to more challenging fields of MEP construction and installation.

The invaluable experience that we earned over the years held us in good stead with many of the new consulting companies that established themselves in the UAE. Our success with handling different projects in close coordination with consultants led to us expanding into far more complex areas and has in turn enabled us to offer professional MEP services to many of our existing clients.

Over the last few years, there has been a rapid acceleration in our growth that saw us rise up to demanding challenges like providing our MEP services to multi-storey tower blocks, hotels, industrial districts and many others, while at the same time continuing to support our own initiatives.

Our position in the industry has grown from strength to new strength primarily because of our commitment to client satisfaction, where we strive to surpass the expectations of each of our clients, however demanding the project.

Our main activities include HVAC Systems, Plumbing and Drainage Works, Electrical Works and Fire-fighting Systems.

Our success with handling different projects in close coordination with consultants led to us expanding into far more complex areas.

Al Amry Transport and General Contracting Est.

General transport plays a vital role in the UAE's plan for rapid progress and development. Transportation is crucial to the construction industry particularly in the development of roads, bridges, and power generation stations, new cities, seaports, airports, petroleum and industrial plants. The vision of Al Amry Transport and General Contracting Est. (AGTC) is to be of world class service to all nations by maintaining trustworthy relationship with our partners, customers and employees.

Starting with a small fleet of trucks providing transport for the Abu Dhabi Municipality, the company has grown and diversified into area leveling and sand-filling for new housing and urban development projects in Abu Dhabi. The Company now owns ninety trucks/tippers and employs nearly 300 people.

Our fleet includes large trucks, graders, wheel loaders, earth moving equipment, batching plants, dozers, asphalt pavers and related equipment manned and operated by skilled personnel. Al Amry Group recognizing the need for proper maintenance and upkeep of its vehicles and equipment, established its own workshop with state-of-the-art facilities to ensure that all equipment is at optimum production capability, thus ensuring maximum output and timely execution of contracts.

Comprehensive Services

Our comprehensive services enable us to meet the needs of our clients, whether they are global, multi-national or local companies and with our flexible approach, can work to specific requirements of particular projects and clients.

Mammut Precast

Established in 1995, Mammut - a sister concern of Al Amry Group of Companies - is amongst the largest industrial contracting companies in the Middle East. Utilizing its manufacturing capabilities through pre-cast and pre-engineered steel building technology, the company leads the industry in meeting market requirements for efficient building solutions.

Mammut provides complete construction solutions, from architectural and structural detailing to manufacturing and hand over by the company's experienced erection teams. Since construction work involves the use of heavy material, most of the work is in the UAE itself where the company is into designing, manufacture and installation of prestressed and precast concrete components such as custom-designed precast wall frame structures including external insulated sandwich panels, all sorts of architectural and structural precast components and systems such as columns, beams and cladding elements for various construction purposes.

At Mammut, we recognize the importance of quality, health and safety. It is a core part of our business activities and we strive to strengthen our policies and training programs to ensure our employees are working in a safe environment at all times, be it in our factories or on construction sites.

Mammut operates the largest precast factory in the world with a capacity to produce over 2.5 million square meters of precast panels per year. The factory's 200,000 sqm facility is equipped with fully-automated production machinery, including a shutter robot, computerized mould plotters, welding machines, concrete distributors and curing chambers.

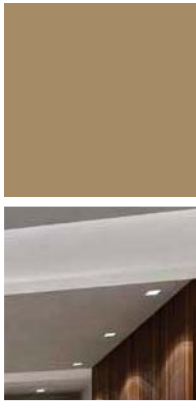

Boudoir Interiors

Boudoir Interiors was established with the sole aim to cater to the interior design needs of the burgeoning housing and construction industry in the UAE, founded on the principle that a multi-disciplinary organization could respond with one clear vision to achieve our clients' need for both functional efficiency and design excellence.

The experienced team of architects, interior designers, engineers and administrative personnel continue to respond to each new challenge with technological expertise and innovative enthusiasm.

Boudoir's portfolio of projects demonstrates a variety of responses, distinguished by its diversity, simplicity, elegance and affordability. The company offers a wide range of services from planning, design consultancy and delivery of high end interiors, combining the client's needs with cultural values and modernity to create fresh, innovative and inspired spaces. Services include development management ensuring that budgets are met and delivery is on schedule, design of spaces that enhance your property, high-tech functionality through use of sophisticated technology ensuring that turnkey projects are executed as conceived.

The transformation of words into sketches and drawings are manifested throughout the design process.

Our People

Al Amry Group employs a workforce of highly trained multinational personnel working under a qualified and motivated, professional management team. The company continually seeks alternative methods of construction and innovative solutions to engineering problems not only to ensure its competitive edge, but also to maintain its established position in an increasingly competitive market. Since its founding, every dimension of our business has seen impressive growth, as is evidenced by its ever-increasing list of clients. Managing selective expansion and diversification has been the key to Al Amry Group's success.

We Believe in Customer Satisfaction

Customer satisfaction has always been our establishment's major permanent objective and all our business decisions, short and long term, have been built around this objective.

With our team you can be sure of the best possible support and services - not just in the short term, but the long term services which are so important to this environment.

The United Arab Emirates has become an international example from the tremendous strides it has taken in its ongoing development. The growth witnessed is unprecedented in this region, and perhaps all over the world. Needless to mention here that, the positive thinking and past achievements including our invaluable experience in various fields of construction has helped us to forge ahead.

Our goal is to excel at every endeavor that we choose to take up while making qualitative contribution to enhance our company's name throughout the Middle East.
